

Lionel Morrison

Experienced Full Stack Developer focused on Continuous Integration, Continuous Development, developing APIs, and adding a sprinkle of magic to web applications.

Relevant Experience

Sr. Software Engineer SFCC, **Under Armour** Sept 2022 - June 2023

- Lead global deployment rollouts and hotfixes working alongside developers and QA engineers to **identify** non-production-ready items
- Instrumental in new search engine implementation: \$30M sales lift, 50% faster search, and improved accuracy
- Proficiently identified, logged, and resolved issues
- Actively engaged in standups and proficiently utilized Jira for recording and tracking work
- Collaborated with creative translating UI layouts into functional code implementations
- Conducted peer reviews of code for both contractors and full-time employees
- Utilized SFRA for crafting high-quality, robust code

Web Application Developer, **Nivel** Aug 2022 - Sept 2022

- Implemented Scrum into development, marketing, and design teams
- Implemented Git and CircleCI for code tracking, code review, and deployment
- Introduced TypeScript and Git as standards for new development
- Created serverless Lambda API for data consumption from KiboCommerce
- Collaborated cross-functionally for UI/UX and SEO enhancements
- Architected serverless API to synchronization 3rd party APIs with companies' source of truth

Web Application Developer, **Redleaf Software** Nov 2018 - Aug 2021

- Led greenfield Angular development for Importing revenue management files into a data-focused SPA dashboard providing market intelligence to optimize hoteliers' revenue through data analysis, forecasts, and budgets
- Significantly decreased report generation time by 60-75% and achieved exponential accuracy improvements freeing up employee time
- Proactively collaborated with product owners to drive UI/UX design and implementation using Adobe XD
- Conducted unit testing to achieve code coverage of the most critical functions
- Orchestrated code deployment of Firebase Functions and sites for User Acceptance Testing

Full Stack Developer, **Porter Brook Group** June 2011 - Nov 2018

- Spearheaded greenfield social, eCommerce, and IoT solutions for local and national businesses
- Implemented DevOps, Agile, and Kanban project management methodologies
- Advocated for an API-first approach in G2B, B2B, and B2C development
- Utilized Linux-based cloud hosting on AWS EC2
- Successfully integrated payment APIs from Stripe and Authorize.net
- Created IoT-based connectivity microservice using Express.js, MariaDB, and PHP
